

HEALTH & SAFETY WARNING FOR USE OF ROOM HEATERS

- 1** For your safety, never leave your room heater unattended. **Avoid carbon mono-oxide poisoning** by turning off the heater and unplug it before leaving room or going to bed. Your room is naturally ventilated. If you'd like more airflow, you can leave your window slightly open.
- 2** Room heaters are supplementary heating and **is not a replacement for your body heat**. Please wear your warm, woolen cap, thermals and socks when you go to sleep if you are cold.
- 3** Remember to **not overload the socket** where the electric heater is plugged. Make sure that the unit is not plugged into the same power socket with other electrical appliances, like the kettle.
- 4** No drying clothes in front of the heater, please. Be wise. Dry them outside.
- 5** To **prevent any fire/severe** burn keep all items like paper, bedding, blankets, furniture away from the electric heater.
